

ATTENTION ESSENTIAL BUSINESS OWNER!

This letter is to provide you with valuable information from business owners and consumers who believe in the freedom to choose, so that your business thrives **WITHOUT** government overreach.

- **LA County Dept of Public Health and ALL state and local government agencies are taxpayer funded** which means that they work for We the People, therefore we are NOT required to comply to unlawful lockdown orders, mandates or requirements! We are required to follow the law!
- **There is no code of law or regulation** that gives authority to a business to coerce individuals into providing private and protected medical information as a condition of commerce. No one is legally allowed to know if you have had any “vaccine”. Federal laws protect our individual medical rights, not *guidelines!*
- **Your business can NOT ensure the health or safety of any individual under the illegal assumption that an individual is spreading an infectious disease.** You have to prove that in a court of law. Under California Legislative Law, Civil Code 46 this is considered slander which is a crime and you can be served notice. Look up: <https://tinyurl.com/2p8h6ap8>

The CDC is a corporately funded private organization that has convinced governments they are the authority over our health and well being. They have clearly shown inconsistencies and confusion regarding the efficacy of the medical interventions they have forced on us.

Note well: If your business is being incentivized by government in order to enforce an unconstitutional medical edict, you have just released control of your business to the government. In other words, they now have the authority to tell you how to run your business.

The government does not have the authority to close your business. Emergency orders and covid-19 measures are unlawful and illegitimate. They are in direct conflict with existing laws.
